

## Pressure Measurement

Pressure transmitters

Single-range transmitters for general applications

### SITRANS P200 for gauge and absolute pressure

1

#### Overview

The SITRANS P200 pressure transmitter measures the gauge and absolute pressure of liquids, gases and vapors.

- Ceramic measuring cell
- Gauge and absolute measuring ranges 1 to 60 bar (15 to 1000 psi)
- For general applications

#### Benefits

- High measuring accuracy
- Rugged stainless steel enclosure
- High overload withstand capability
- For aggressive and non-aggressive media
- For measuring the pressure of liquids, gases and vapors
- Compact design

#### Application

The SITRANS P200 pressure transmitter for gauge and absolute pressure is used in the following industrial areas:

- Mechanical engineering
- Shipbuilding
- Power engineering
- Chemical industry
- Water supply

#### Design

##### *Device structure without explosion protection*

The pressure transmitter consists of a piezoresistive measuring cell with a diaphragm installed in a stainless steel enclosure. It can be used with a connector per EN 175301-803-A (IP65), a device plug M12 (IP67), a cable (IP67) or a Quickon cable quick screw connection (IP67) connected electrically. The output signal is between 4 and 20 mA or 0 and 10 V.

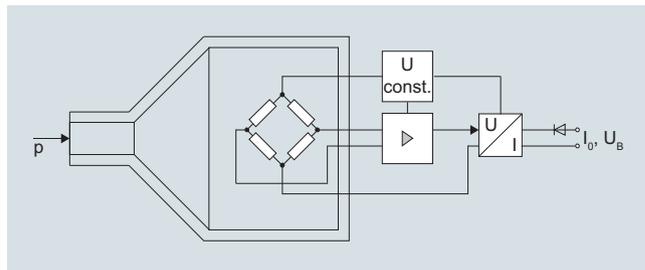

##### *Device structure with explosion protection*

The pressure transmitter consists of a piezoresistive measuring cell with a diaphragm installed in a stainless steel enclosure. It can be used with a connector per EN 175301-803-A (IP65) or a device plug M12 (IP67) connected electrically. The output signal is between 4 and 20 mA.

#### Function

The pressure transmitter measures the gauge and absolute pressure of liquids and gases as well as the level of liquids.

##### *Mode of operation*

SITRANS P200 pressure transmitters (7MF1565-...), functional diagram

The ceramic measuring cell has a thick-film resistance bridge to which the operating pressure  $p$  is transmitted through a ceramic diaphragm.

The voltage output from the measuring cell is converted by an amplifier into an output current of 4 to 20 mA or an output voltage of 0 to 10 V DC.

The output current and voltage are linearly proportional to the input pressure.

## Technical specifications

<b>Application</b>		Electromagnetic compatibility	
Gauge and absolute pressure measurement	Liquids, gases and vapors		<ul style="list-style-type: none"> <li>• acc. IEC 61326-1/-2/-3</li> <li>• acc. NAMUR NE21, only for ATEX versions and with a max. measuring deviation <math>\leq 1\%</math></li> </ul>
<b>Mode of operation</b>		<b>Design</b>	
Measuring principle	Piezo-resistive measuring cell (ceramic diaphragm)	Weight	Approx. 0.090 kg (0.198 lb)
Measured variable	Gauge and absolute pressure	Process connections	See dimension drawings
