Base unit

Overview

The entire SIPROCESS GA700 device is configured in a modular fashion and consists of a base unit and at least one – maximum two – modules. It can optionally be fitted with up to two interface modules.

Benefits

The base unit provides:

- Transmission and evaluation of measurement results
- · Display and transmission of device parameters
- Operation (parameterization, configuration)

In addition to the modules, the base unit contains the interfaces for the peripherals.

Application

Application areas

Depending on the modules installed, the device is predominantly used in the following sectors:

- Chemical industry
- · Petrochemicals
- Steel
- Cement
- Power generation
- Environmental protection

Design

19" rack unit

- 19" rack unit with 3 height units (HU) for installation
 - in hinged frames
 - in cabinets
- Gas connections directly on the analyzer module for sample gas inlet and outlet: for pipe diameter 6 mm
- Purging gas connections (optional), purging gas connection for 6 mm or 1/4" hose (optional)
- ATEX-/IECEx approval for Zone 2

Wall-mounted device

- Gas connections directly on the analyzer module for sample gas inlet and outlet: Pipe union for pipe diameter 6 mm
- Purging gas connections (optional): Pipe diameter 12 mm
- ATEX-/IECEx approval for Zones 1 and 2

Field device

- Field control unit: Flameproof encapsulated enclosure with mounted Ex e connection enclosure (IP55)
- Ex-d field module with installed module (IP65)
- ATEX-/IECEx approval for Zone 1
- Maximum cable length of the cable between field module and field control unit: 7 m

Display and control panel

- · LCD panel for simultaneous display of:
 - Measured value
 - Status bar
 - Measuring ranges
- Menu-driven operation for parameterization, test functions, adjustment
- Operator support in plain text
- Operating software in six languages (English, German, French, Italian, Spanish, Portuguese)

Display and operator panel of the SIPROCESS GA700 devices

Inputs and outputs

- 19" rack unit and wall-mounted unit
 - 8 digital inputs, designed for 24 V, floating, freely configurable (e.g. for measurement range switchover, processing of external signals from sample preparation)
 - 8 relay outputs, with changeover contacts, freely configurable (e.g. for faults, maintenance requests, limit alarms, external solenoid valves)
 - Ethernet connection contained in the base unit (connection on the rear side, Ethernet RJ 45, 100 MBit)
 - Service interface (front side); Ethernet RJ 45, 100 MBit.
- · Field control unit
 - 1 analog output for each component 0/4 to 20 mA
 - 5 relay outputs, with changeover contacts, freely configurable, e.g. for faults or measuring range identification
 - 5 digital inputs, designed for 24 V, floating, freely configurable, e.g. for measurement range switchover

Interface modules

- 19" rack unit and wall-mounted unit
- Interface module 1.1:
- 12 relay outputs and 8 digital inputs
- Interface module 2.1:
 1 analog output for each measuring component (0/4 to 20 mA or configurable according to NAMUR), plus 3 relay outputs for each module
- Interface module 2.2: One analog output for each measured component (0/4 to 20 mA or configurable according to NAMUR), 4 analog inputs and 4 digital inputs
- Field control unit
- Interface module 2.2:
 - 4 analog inputs 0/4 to 20 mA

Function

Essential characteristics

- Measuring range identification
- Storage of measured values possible during adjustments
- Four freely parameterizable measuring ranges, also with suppressed zero point
- · Autoranging possible; remote switching is also possible
- Wide range of selectable time constants (static/dynamic noise suppression); i.e. the response time of the analyzer can be matched to the respective measuring task
- Measuring point switchover for up to 12 measuring points (programmable)
- Parameterizable measuring point identification
- Automatic, parameterizable measuring range calibration
- Operation based on the NAMUR recommendation
- Three control levels with their own authorization codes for the prevention of accidental and unauthorized operator interventions
- Simple handling using a numerical membrane keyboard and operator prompting
- Customer-specific analyzer options such as:
 Customer acceptance
 - TAG labels

Base unit

Technical specifications

	19" rack unit	Wall enclosure	Field control unit			
General information						
Operating position	Horizontal	Vertical	Horizontal			
Conformity	CE mark in accordance with EN 50081-1	and EN 50082-2				
Design. enclosure						
Weight without module	8.6 kg	23 kg	27 kg			
Degree of protection	IP20 according to EN 60529	IP65 in accordance with EN 60529, restricted breathing enclosure to EN 50021	IP55 according to EN 60529			
Electrical characteristics						
Auxiliary power	100 240 V AC (nominal range of use 8	f use 47 63 Hz)				
Power consumption	Max. 280 VA					
EMC interference immunity (electromagnetic compatibility)	In accordance with the standard requirements of NAMUR NE21 (05/2006) and EN 61326-1 (2013)					
Electrical safety	In accordance with EN 61010-1, overvoltage category II					
Gas inlet conditions, purging gas pressure						
Continuous (recommended)	-	30 hPa above atmospheric pressure	-			
Continuous (maximum)	-	< 100 hPa above atmospheric pressure	-			
Transient (maximum)	-	165 hPa above atmospheric pressure	-			
Electrical inputs and outputs						
Analog outputs	-	-	1 for each component 0/4 20 mA, floating; load \leq 100 $\Omega,$ RL \leq 750 Ω			
Relay outputs	8, with changeover contacts, can be free range identification; max. load: 24 V AC/I in continuous operation max. 160 W), floa	5, with changeover contacts, can be freely configured, e.g. for measuring range identification; load rating: 24 V AC/DC/1.7 A, isolated, non- sparking				
Digital inputs	8, designed for 24 V, floating, freely confi switchover	5, designed for 24 V, floating, can be freely configured, e.g. for measuring range switchover				
Ethernet interface Ethernet RJ 45, 100-megabit	Rear	Underside	Underside			
Service interface Ethernet RJ 45, 100-megabit	Front (behind door)	Inside on the processing unit	Inside on the processing unit			
Interface module 1.1	12 relay outputs, with changeover contact (total load for all 12 relay outputs in contin non-sparking	-				
	8 digital inputs, designed for 24 V, floating					
Interface module 2.1	1 analog output for each component 0/4 load 100 $\Omega \le R_L \le 750 \Omega$;	-				
	outputs in continuous operation max. 122					
Interface module 2.2	1 analog output for each component 0/4 load 100 $\Omega \leq R_L \leq$ 750 $\Omega;$	4 analog inputs 0/4 20 mA, non-floating, internal resistance \leq 100 W				
	4 analog inputs 0/4 20 mA, non-isolate 4 digital inputs, designed for 24 V, floatin					
Climatic conditions						
Permissible operating altitude	3 000 m above sea level		2 000 m above sea level			
Permissible ambient temperature (with one module; application-depen- dent with two modules)	Depends on application, See technical specifications of the modules	Depends on application, See technical specifications of the modules	-30 + 70 °C during storage and transportation			
	Ventilation slits must not be covered (recommended minimum clearance upward from the next device when installing 2 modules and at maximum ambient temperature: min. 1 HU)		5 55 °C for regular operation with OXYMAT 7 5 60 °C for operation with OXYMAT 7 and with limited measur- ing accuracy			
Permissible humidity	< 90% RH (RH: relative humidity), during storage, transportation and operation (must not fall below dew point)					

Extractive continuous process gas analysis

Possible combinations

You can install a maximum of two analyzer modules in the wallmounted and rack-mounted enclosures of the SIPROCESS GA700 series. No fixed allocation rules apply. Every module can be operated in every slot.

The following restrictions must be observed:

- Change to measuring frequency required:
 [O7 and O7]: 8.33 Hz (O7 No. 1) 10 Hz (O7 No. 2)
 [O7 and U7]: 10 Hz (O7) 12.5 Hz (U7)]
- Restricted temperature range: [U7 and O7] or [U7 and C7]: 5 to 45 °C
- Restricted smallest measuring range: [U7 and O7]
- NAMUR NE21 does not apply in combination: [C7 and U7] or [C7 and O7]
